TITLE	Student Enrollments, Fall 1995.
INSTITUTION	Arkansas State Dept. of Higher Education, Little Rock.
PUB DATE	Jun 96
NOTE	111p.
PUB TYPE	Statistical Data (110)
EDRS PRICE	MF01/PC05 Plus Postage.
DESCRIPTORS	*College Attendance; College Freshmen; Community Colleges; Demography; Educational Facilities; Enrollment; *Enrollment Trends; Ethnicity; Geographic Distribution; *Higher Education; High Risk Students; Remedial Instruction; School Holding Power; State Universities; Transfer Students; Trend Analysis; Two Year College Students
IDENTIFIERS	*Arkansas

ABSTRACT

This document presents demographic information about enrollment at public and independent institutions of higher education in Arkansas as of fall 1995. A listing of abbreviations for the public four-year, public two-year, and independent institutions is followed by a map of their locations. An executive summary identifies highlights such as the following: a headcount of 101,245 students at the 45 public and independent institutions, slightly higher than the year before; a pattern of declining enrollment at many of the public universities; a major enrollment increase in the two-year technical colleges; and black students comprised 15 percent of total student enrollment. The bulk of this document consists of 39 tables and associated figures. An overview section presents tables which provide data on: total on-campus headcount by type of institution, 1991-1995; total on-campus full-time equivalency by public institution, 1992-1995; total on-campus headcount by student level and attendance status, 1991-1995; college going rate for first-time students at Arkansas institutions; and Arkansas college going rate, 1980-1995. Other sections present tables detailing data on race/ethnicity, gender, age, attendance status, transfers, geographic origins, retention, and first-time freshmen enrolled in remedial courses. (KG)

EXECUTIVE SUMMARY

Enrollments in Arkansas higher education exceeded 100,000 students for the second consecutive year, with a fall 1995 headcount of 101,245 students at the 45 public and independent institutions. Of the grand total, 89.2% were enrolled in public higher education, a proportion that is only one percentage point higher than fall 1986. Total enrollment was approximately 1,100 students higher than a year earlier. When compared to 1992 (the base year when the technical colleges were added), enrollments were up 2.1%. Among the other highlights found in the following tables are:

- Enrollment patterns for many of the public universities since the early 1990s has been one of decline. While several of the schools showed gains since 1992 (Arkansas Tech Universities, the University of Arkansas, Fayetteville, and the University of Arkansas for Medical Sciences), the increases have been modest and were not consistent. Of particular concern was the one-year enrollment decrease reported by the University of Arkansas at Pine Bluff (-9.8%), and the larger, longer-term enrollment drop by the University of Arkansas at Little Rock (-11.0%).

- After a 5% decline between 1992 and 1994, the community colleges rebounded in fall 1995 with an enrollment of more than 20,000 students. Phenomenal expansion of the technical colleges began in 1992 and continued through 1995, as that segment of the two-year schools more than doubled the number of students being served during the three-year period. The highest rates of increase were reported by Mid-South Community College and Pines Technical College, with double-digit growth occurring at nine other community and technical colleges as well. Lower tuition, expanded academic programming, and the ability to offer transferable general studies coursework have attracted greater numbers of students to the two-year institutions.

- Among the independent colleges and universities, the one-year change was mixed, with eight of twelve institutions showing higher enrollments in fall 1995. The most notable increases were reported by John Brown University and Philander Smith College, while significant declines recorded for Shorter College and Arkansas Baptist College.

- The decline of university enrollments between 1994 and 1995 (-1.8%), and the increase of those at the two-year schools (6.3%), was mirrored in the production of full-time equivalent students. The growth in part-time enrollments at the two-year institutions takes on even greater significance when the expansion is put in a three-year context. Since 1992, the two-year colleges have added approximately two students for each additional full-time equivalent enrollment.

- The number of first-time entering students declined at the four-year and two-year, public and independent institutions. The total undergraduate headcount at the public universities also was down (-1.9%), but independent colleges and universities show an equal percentage increase (+1.9%). Two-year public colleges, in contrast, absorbed a 36.5% increase in the number of returning students, jumping from 15,567 to 21,249.

- Graduate enrollments at public institutions reached a record high of 7,200 students, and first professional headcount continued to hold for the fourth year at 1,700. Students in master's programs at independent schools grew by 28.5%, largely due to program expansion at John Brown University.

- The college going rate measures the proportion of college students who enroll in post-secondary education immediately after finishing high school, and serves as an indicator of the total percentage of a specific year's graduates who will ever attend college. It reflects graduates' perception of the value of enrolling in college rather than pursuing other activities such as working

Continued on next page

or entering the military. For fall 1995, the college going rate was 55.4%, reflecting a minor decrease of 0.7% from 1994, but within the general range of the past four reporting periods. This year's full-time entering cohort was approximately 350 fewer students than the prior year, with nearly half that reduction absorbed by the independent institutions. It is unlikely that the college going rate will improve for the next several years. The continued shrinking of the number of high school graduates, coupled with the increasing number of entering college freshmen who initially enroll part-time, will likely have an adverse effect on the college going rate until the baby boomlet begins graduating from high school in the year 2000.

- In terms of race/ethnicity, both the four- and two-year sectors reported that black students comprised 15% of the total student enrollment. The increase of more than 1,300 black students in the two-year colleges since 1993 contrasted with the slight drop at the universities. At independent institutions, the proportion also was in the 14-15% range. At the graduate level, the number of black students increased by more than 100, while a declining proportion was found for first-professional students.

- The proportion of male-to-female students remained virtually unchanged within each sector when comparing fall 1992 data with fall 1995, with female students outnumbering males. Fifty-five out of every 100 university students are female, but two-year colleges document a 60:40 ratio of females over males.

- While 70% of the university students were in the traditional-aged brackets (under 25 years), 55% of students at the two-year schools were 24 years or younger. The colleges, however, are attracting greater numbers of younger students, with an increase of 2-3 percentage points since 1992. The average ages for the public universities and colleges were 24.9 and 27.7 years respectively.

- Seventy-five percent of public university students attended full-time in 1995, a proportion that has been largely unchanged for the past few years. The larger proportion of working adults at the two-year campuses resulted in only 45% of the students carrying a full courseload. In contrast to the universities' enrollments, a growing percentage of college students attend part-time. The highest proportion of full-time students, however, were reported by the independent colleges, with more than 90%.

- More than 4,900 students were reported as undergraduate transfers between Arkansas institutions in fall 1995, with the prevailing flow of student transfers going from one four-year public university to another. Another 20% of the public university transfers continued at a public two-year college, while 27% moved in the opposite direction: from two- to four-year public. Part of the reason for the rather large number of transfers is the ease of changing institutions due to the statewide common core of general studies. Courses that apply to the common core for baccalaureate degrees at state-supported institutions are fully transferable among institutions.

- As expected, institutions drew students most heavily from their surrounding counties and from more heavily populated areas.

- The percentage of in-state undergraduates (86%) has been unchanged for at least five years. Out-of-state undergraduates dropped from a high of 12.9% in fall 1992 to its current level of 11.2%. As expected, the largest number of out-of-state undergraduates came from border states, such as Texas (14%), Missouri (12%), and Oklahoma (8%). The number of students from foreign countries, meanwhile, increased to approximately 2,000.

- Two out of every three first-time, full-time, degree-seeking students statewide returned one year after entry. Two years after entry, retention rates for students continuing at their original institution

Continued on next page

dropped by 15 percentage points, and by three years after entry, the persistence rate was 40%. These data do not include students who transferred or completed a program of study.

- Retention rates by demographic groupings revealed that women persisted at higher rates than men, whites higher than blacks, and younger students higher than older.

- Comparing first-year retention rates across three entering cohorts at the public universities, Arkansas State University-Jonesboro, the University of Arkansas, Fayetteville, and the University of Central Arkansas documented increases. By contrast, five universities had steady declines of varying sizes in first-year retention rates each freshmen group, but many of these had a significant number of transfers.

- Two-year institutions increased their average retention rates from 37.5%, for the 1992 cohort, to 43.9% for the students beginning in 1994. This increase, however, was offset by a decline of 7.7% in certificate completions. Ten colleges showed continuous improvement in first-year retention rates across the three cohorts: Arkansas State University-Beebe, Black River Technical College, Cossatot Technical College, Garland County Community College, Gateway Technical College, Mississippi County Community College, Mid-South Community College, Northwest Arkansas Community College, Ouachita Technical College, and Red River Technical College.

- Approximately one-third of the fall 1995 entering freshmen enrolled in developmental coursework in English. The average for the universities--26.8%--was substantially lower than the two-year colleges' rate of 47.3%. While percentages are lower than in fall 1994, the greatest need for remediation continued to be mathematics, with one out of every two freshmen enrolled in a developmental math course in fall 1995. Forty percent of the university freshmen registered for remedial math; by contrast, the level was 72% for first-year students at the two-year colleges. Slightly more than one-fourth of all students in public higher education were enrolled in remedial reading, but the proportion of college students requiring remediation was twice that for university students.

Table 1. TOTAL ON-CAMPUS HEADCOUNT BY TYPE OF INSTITUTION, 1986 - 1995

* Cohorts =students who are first-time, full-time, award/degree-seeking, and have the specified demographic characteristic.
Enr. = Enrolled at either original institution or transfer institution.
Cert. = Certificates of Proficiency + Technical Certificates A. Deg = Associate Degree Bac. Deg = Baccalaureate Degree
% Cumulative Graduation = proportion of the cohort that completed a certificate or degree program at the original and transfer institutions for all years.
% 1st Year Cohort Success and % Cumulative Cohort Success = most recent annual retention rates at the original and transfer institutions + the cumulative total of students awarded a certificate or degree at the original and transfer institutions/the number in the original cohort.

Notes:

Cohorts =students who are first-time, full-time, award/degree-seeking for a given fall semester.

Natives = students continuing to enroll in original institution.

Transfers = students continuing to enroll in an institution other than original college/university.

Enr. = Enrolled

Cert. = Certificates of Proficiency + Technical Certificate A. Deg. = Associate Degree Bacc. Deg. = Baccalaureate Degree

% Annual Retention = proportion of the cohort that continues to be enrolled either as a native or transfer student in a given year.

% Cumulative Graduation = proportion of the cohort that completed a certificate or degree program at the original and transfer institutions for all years.

% 1st Year Cohort Success and Cumulative Cohort Success = most recent annual retention rates at the original and transfer institutions + the cumulative total of students awarded a certificate or degree at the original and transfer institutions/the number in the original cohort.

**Data for ASUB and ASUB/N were a combined submission in 1992.

Notes: Students enrolled in remediation are those not meeting the Freshmen Assessment and Placement Standards (Act 1052) established by the State Board of Higher Education.
Headcount also includes students enrolled in remediation as a result of further testing.
First-time Freshmen cohort includes on and off campus, degree seeking students.
